Add appliance

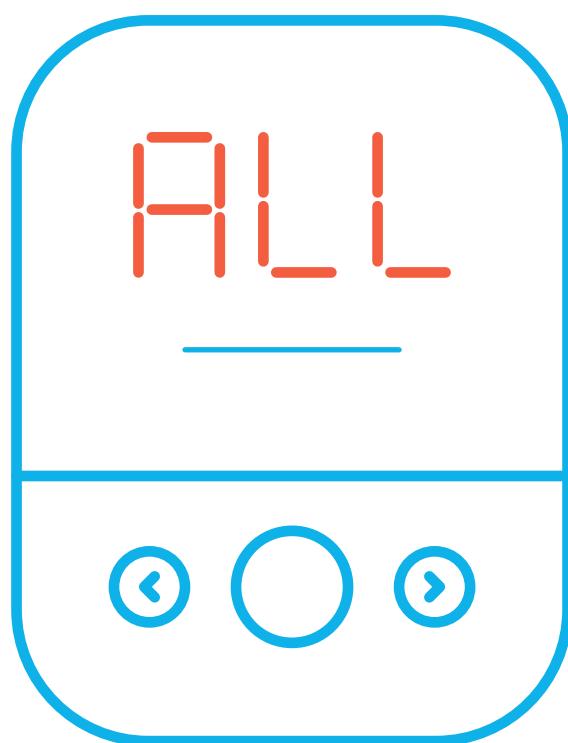

Make sure your air-conditioner is within the IR Controller's field of view

Next

← Add appliance

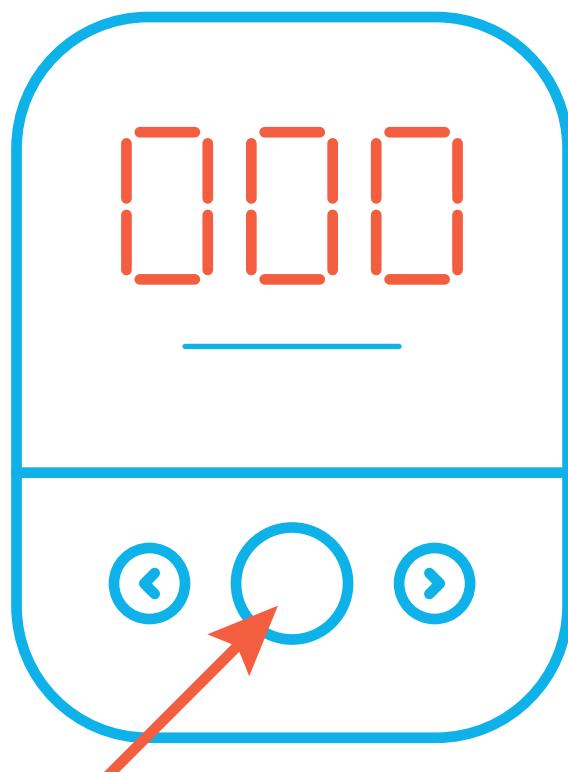

Press and hold the left and right buttons...

... until the word “ALL” appears.

Next

← Add appliance

1.

Press the centre button to start scan

2.

Be ready! Once the scan starts, watch the numbers. When the IR Controller beeps, press the centre button again *immediately* to pause the countdown. This stops it on the code you need to enter to complete pairing.

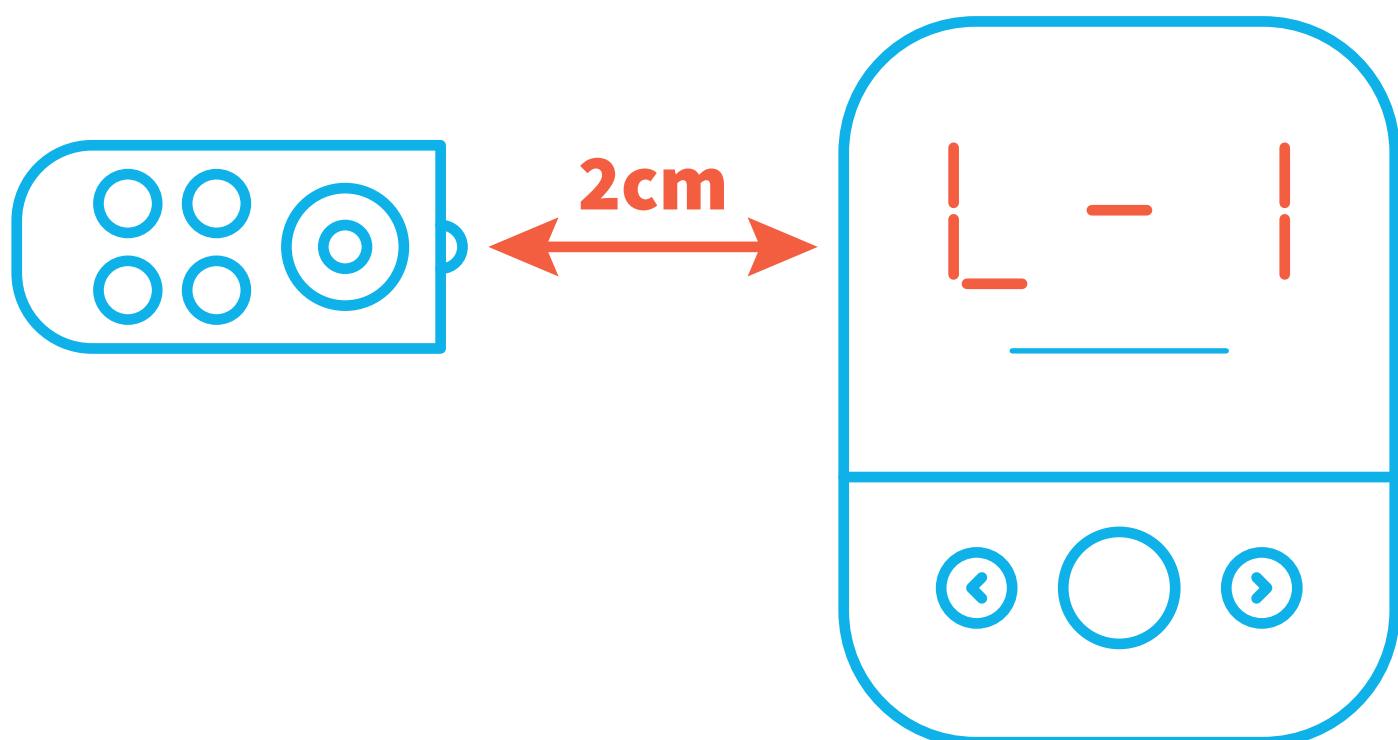

Retry

(I missed the code)

Enter code

Add appliance

Teaching: “On”

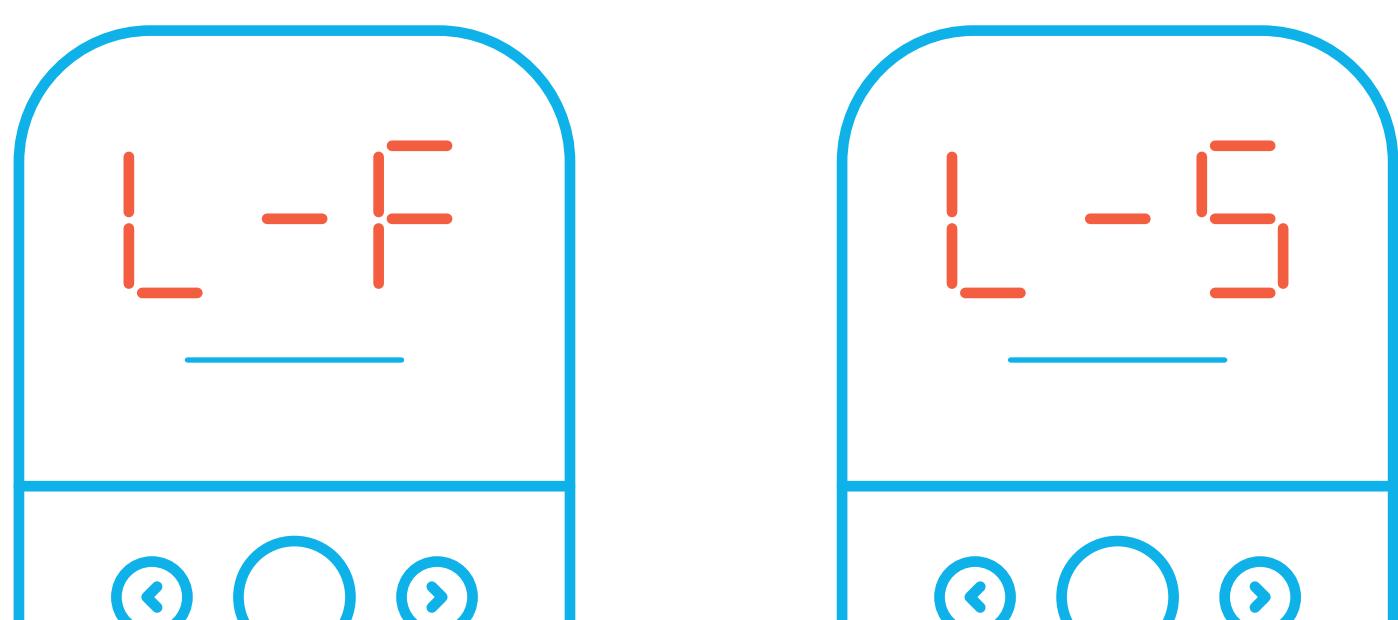

1.

“L-1” should appear on the IR Controller

2.

Hold your remote 2cm from the IR Controller, and press the button you want it to learn repeatedly.

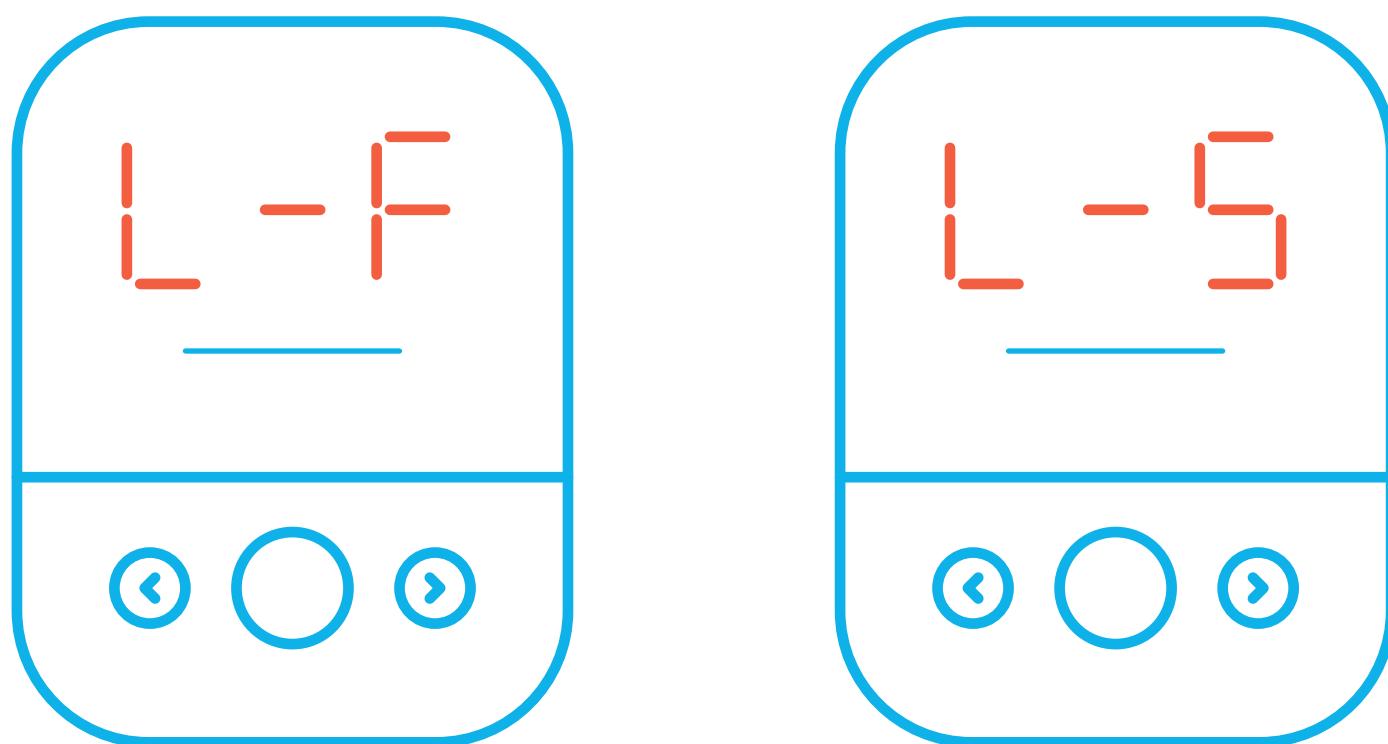

← Add appliance

1.

“L-1” should appear on the IR Controller

2.

Hold your remote 2cm from the IR Controller, and press the button you want it to learn repeatedly.

If successful, “L-S” will appear.

If the learning was unsuccessful,
“L-F” will show.

Retry

(It was unsuccessful)
